

Biowaste bin cleaning

This keeps the bin clean

Organic waste bins should be cleaned regularly to prevent vermin and odours. We offer organic waste bin cleaning as a service.

How does the ESB's organic waste bin cleaning service work?

After emptying, the organic waste bin is cleaned in a special vehicle with water and an **environmentally friendly cleaning agent** and placed upside down with the lid open after cleaning. Please collect the bin back to your property as soon as possible after cleaning.

What do I have to pay attention to?

The best cleaning result is achieved when the bin is used as intended. You should pay particular attention to the following waste:

- Liquids
- Oils and fats
- Cat litter and small animal litter

These substances have no place in the bio bin and make cleaning the bio bin impossible.

What does cleaning cost?

Cleaning the organic waste bin is an **additional service for which there is a charge**. You can choose the option that suits you best from two tariffs(*as of 01.01.2023*):

Cleaning costs

K COMFORT

19 cleanings per year
Feb./March. - Nov. every 2 weeks

3,90 Euro

74,10 Euro

S STANDARD

8 cleanings per year
Mar. - Oct. every 4 weeks

4,50 Euro
