– What you should bring with you

- At least secondary school leaving certificate (Mittlere Reife/Realschulabschluss)
- Technical understanding and interest
- Enjoy solving IT challenges
- Ability to work in a team
- Communication skills
- Willingness to learn and perform
- Flexibility

– This is how the training works

The three-year training takes place at the Bocholt municipal administration. The IT-related vocational school training is provided weekly by the [Berufskolleg Bocholt-West](#) [↗](#) and the business-related part by the [Berufskolleg am Wasserturm](#) [↗](#).

The 1st year of training includes

- the creation of connections of systems
- the overview of information and communication technology systems in terms of areas of application, performance and economic efficiency
- assessing the compatibility of memory modules, input and output components and peripheral devices, programming techniques and programming logic, creating and connecting systems.

The 2nd and 3rd years of training comprise

- the examination of offers of information and telecommunication services
- the analysis of faults using diagnostic tools and the correction of fault typology and fault frequencies
- preparing projects and concepts for system solutions
- the introduction of system solutions in cooperation with the users
- the occurrence of hardware and software errors, operating errors and problems with information and work organisation
- the planning and implementation of user training

— Possible areas of employment after the training

After successfully completing their vocational training, IT specialists for system integration can be employed in many authorities, organisations & companies in various fields to set up and support the IT infrastructure.
