

Building file online

The online service "Bauakte Online" provides building owners with up-to-date information on the procedural status of their individual building project.

The online information on submitted building applications is a service of the City of Bocholt for **building** owners, **drafters** and **all those involved in construction**. The service is available for all building applications. In this way, the corresponding procedural progress of a submitted building application can be queried at any time.

Find out the [status of your building project](#) ↗.
