

Facade renovation

This is what you have to bear in mind

You would like to renovate the energy efficiency of your building, which is located directly on the urban traffic area, by means of a new façade (ETICS, clinker bricks, brick slips, etc.) and need a permanent superstructure on the urban traffic area for this purpose?

The costs incurred for the construction project (administration, user fees and production costs) are to be borne by the applicant.

Processing time

The processing time for the construction measure to be applied for is **about six weeks**. A site visit with a member of staff from the "Mobility and Environment" department must be arranged for each construction project.
