

Private supply lines

This is what needs to be considered

You would like to supply your property with private lines (telecommunication lines, drainage lines, heat transport lines, water lines, etc.)?

The costs incurred for the construction project (administrative fees, user fees and production costs) are to be borne by the applicant. Private power lines are generally excluded from the municipal permit.

Processing time

The processing time for the construction measure to be applied for is **about six weeks**. A site visit with a member of staff from the "Mobility and Environment" department must be arranged for each construction project.
