Topic

In Strasbourg and Brussels, Mainz political scientist and lecture professional Ingo Espenschied goes in search of clues, talks to MEPs from various parties and looks over the shoulders of parliamentarians and the administration in their daily work.

A look back at the eventful history of the European Parliament provides additional clarity. What began as a small, primarily representative institution has matured over the course of more than 65 years into a weighty political player within the EU. Today, the European Parliament is not only the legislator in Europe - its history is also a mirror of European integration as a whole.
