The Edy Edwards Trio with sound and in colour

When rock and blues have arrived in the here and now, much is allowed and even more is possible. It is precisely this freedom that the young man with entertainer qualities, who goes by the name Edy Edwards, uses wherever he can.

The roots of rock, blues and Americana are omnipresent and clearly audible. His early musical upbringing shaped him, from Robert Johnson to John Lee Hooker, the Rolling Stones to Led Zeppelin - and they have left their mark. Coupled with modern influences from pop to electronic music, Edy has cultivated his own style.

style. This exciting mixture is not necessarily new, with these ingredients the Black Keys, Jack White or Kaleo have come a long way, with German lyrics, the whole thing is almost unheard of. The lyrics are sometimes flowery and bitter, then again cheeky and straightforward, but always right from the heart of life. Just like Edy himself - difficult to classify and surprising. The connecting link in his work is his catchy voice, which allows him to always reinvent himself musically and break new ground.
