

"Giving care a face"

Action in Bocholt city centre on International Care Day

Under the motto "Giving care a face", senior citizens' facilities, amulant care services and technical colleges from Bocholt, Rhede and Isselburg will present themselves at various locations in the city centre of Bocholt.

With this campaign, the participating institutions want to encourage a change of perspective on International Care Day and show what care can do. Interested people have the opportunity to inform themselves comprehensively and get practical insights into the daily work of professional carers.
