The current programme for the CD of the same name, through which Roger Stein plays and chats multi-instrumentally and rhyme-laden, is full of longing and humour, is poetic and rich in imagery at the same time and shows that the greatest enemy of happiness in life is one's own comfort.

Songs and satire instead of off the air! Now more than ever! Not everything that is heavy has weight and not everything that looks is important. Roger Stein disenchants the special and enchants the ordinary, wit, mischievousness and poetry without slogans, but with plenty of passion.

Songs of loneliness.

Roger Stein has long been a fixture on the German singer-songwriter and cabaret scene and has played hundreds of concerts in recent years. He has toured up and down the German-speaking world with his formation Wortfront since 2005, before his solo career began in 2011 at a small Meissen singer-songwriter festival.

His solo albums have now found a good home under the umbrella of Konstantin Wecker's "Sturm und Klang" label.
