– How do I place the bins correctly?

We empty most waste containers in Bocholt with a so-called side-loader vehicle. With this vehicle technology, the containers are emptied by the driver from the driver's cab. The loading process is controlled by a computer and monitored by a camera.

A few **rules** must be observed when providing the waste containers:

- Place the waste bins on the street by 6 a.m., at the earliest the evening before.
- Return the bins to your own property after emptying.
- The lid must be closed.
- Place 2 bins of the same size very close together in pairs
- For mixed pairs, the smaller bin should be on the left when viewed from the street.
- Leave a distance of approx. 20 cm between two pairs
- The lid opening faces the street, the handle faces the property.
- Leave sufficient space to all sides and to obstacles.
- Please also consider overhanging roofs, overhanging trees and road signs.
