

Night of Training annually on the 3rd Thursday in November

The district-wide "**Night of Education**" will take place in 2025 on **20 November 2025**.

During the evening, the participating companies will open their doors at their own locations and present themselves to interested pupils, young adults, their parents and other interested parties. The training companies will provide information directly on site about the company, its training opportunities and internships.

Those interested in training have the **opportunity to visit the companies without making an appointment in advance and thus gain a comprehensive impression of the potential workplace**. The impression of those seeking training goes far beyond mere information: seeing where and with whom they work in the company and what awaits them as trainees in the company certainly contributes to the decision in favour of the right company.

All information about the "Night of Apprenticeships" 2025 will be published here in good time.
