Maths show in the lecture hall of the Westphalian University of Applied Sciences

City of Bocholt invites 430 pupils // Influencers inspire with brainteasers

The JUNGE UNI of the city of Bocholt invited the surrounding secondary schools to a maths show with the social media influencers Josef Naber and Johannes Mensing, better known as "MatheMind".

"MathMind": 240,000 followers on TikTok

In two events, a total of 430 pupils were convinced that "anyone can do maths" - because that's what the speakers' slogan says.

"We are delighted that so many pupils accepted our invitation and that we are finally able to use and fill a lecture hall at the Westphalian University of Applied Sciences again after the long pandemic break," says Jennifer Engels, head of the JUNGE UNI in Bocholt.

Packaged in a maths show à la "Who wants to be a millionaire", alternative calculation methods from China and India were presented, but also topics such as probability calculation and linear and exponential growth were vividly conveyed.

Josef Naber and Johannes Mensing are successful social media influencers: On TikTok([@mathe_mind](#)) they regularly inspire more than 240,000 followers, and on Instagram([@mathe_mind](#)) more than 62,000 users follow them.

Following this entertaining show, the Westphalian University of Applied Sciences took the opportunity to vividly present, with the support of the robot "Nao", the soon-to-be-launched robotics degree programme, but also one of the JUBoh courses for the summer semester 2023. An exoskeleton and work with VR glasses were also used.

Prof. Dr.-Ing. Thomas Naber was pleased to have the opportunity to give the pupils a small insight into university life and the degree programmes offered at the Bocholt location.

JUNGE UNI presents new programme

On 26 January, the new programme of the JUNGE UNI in Bocholt will be published. Registration for the courses will be possible from 2 February. Already on 10 February, the year will be ceremoniously rung in again at a large, free annual kick-off event in Lecture Hall 1 of the Westphalian University of Applied Sciences. Dipl. Ingenieur Joachim Hecker will inspire and amaze the young participants with his science show.

The event will be musically accompanied by the music school band "Pineapple Juice" from the Bocholt-Isselburg Music School. Registration for this event will be possible from 24 January on the homepage www.juboh.de.
