Children and youth

New family planner for 2027 now available

A handy guide for the whole year: the new Bocholt family planner is out now

The new Bocholt Family Planner for 2027 is now available. Published by the Bocholt branch of the Child Protection Association, this guide offers families practical help with everyday life as well as an insight into the wide range of local activities available for children and young people. Mayor Mangel received the first copy at the official launch on 16 September.

The Bocholt branch of the Child Protection Association is continuing the tradition in 2027 by bringing the popular family planner to market. The town of Bocholt is supporting the project in collaboration with the company Stempel Meyer, both through financial backing and active editorial involvement. In addition, the Stadtparkasse Bocholt and Bocholter stadtworke are ensuring the calendar's production through their financial support.

The design process was preceded by an open call in the media. Numerous clubs, organisations and associations committed to the welfare of children and young people in Bocholt responded to the invitation and contributed to the content. The twelve monthly pages therefore showcase a wide range of local initiatives and points of contact for parents, children and young people.

Interested members of the public can now purchase the 2027 Family Planner for a nominal fee of one euro. Copies are available at the Child Protection Association's office, the Family Education Centre, the municipal library and the Bocholt Tourist Information Centre. The guide is also available from Stempel Meyer and at the Shopping Arkaden information point.
