How do I finance the energy-efficient refurbishment of my home?

**Subsidy grants and loans for heating, insulation and more
// Free online information event on Monday, 3 June from 7 pm**

What subsidies are available for a new heating system based on renewable energies? How do I finance the insulation of my home? How can my house become a subsidised efficiency house? Answers to these and other questions about financing an energy-efficient renovation of your home will be provided at a regional public information event on Monday, 3 June 2024. The event will run from 19:00 to 20:30.

Registration form

The event will take place online via Zoom. [Registration and connection is possible until shortly before the start of the event. \(Click here.\)](#) 

Afterwards, registered persons will receive the access data by e-mail. Participation in the event is free of charge.

Contents

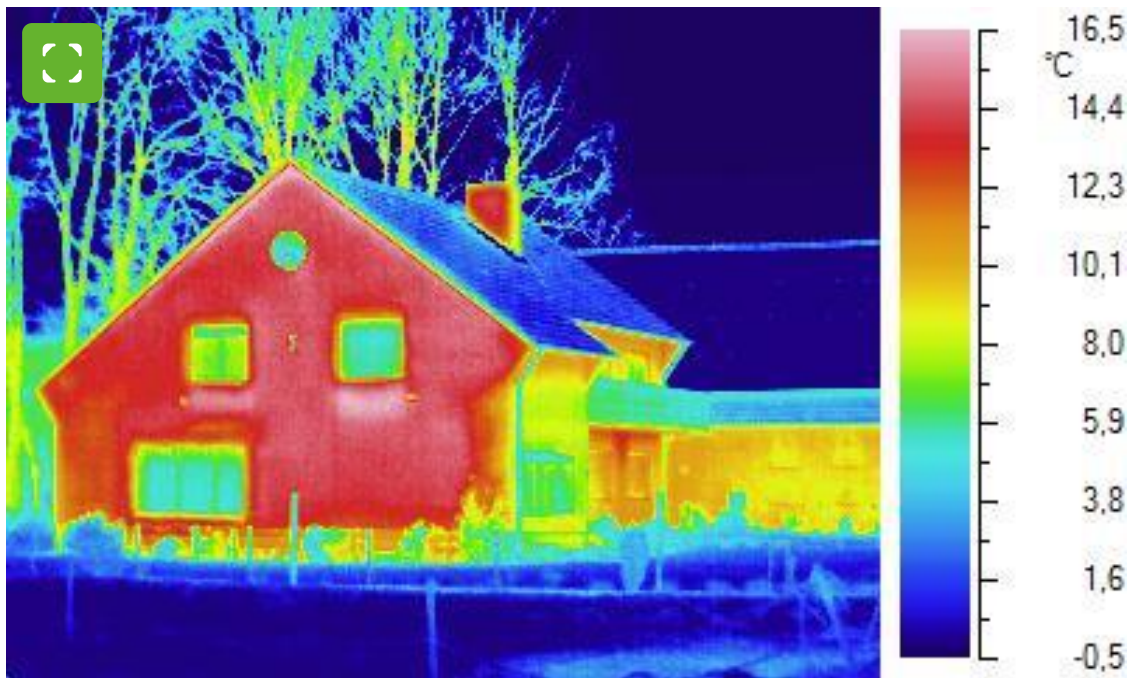

To make your home fit for the future, insulation measures and switching to a heating system based on renewable energies are essential. Participants at the regional information event will find out which state support programmes are available and what needs to be considered when applying for subsidies and loans

At the event, Eckard von Schwerin will first present the grants and loans offered by the Kreditanstalt für Wiederaufbau (KfW) in the areas of heating replacement and energy-efficient refurbishment. Energy consultant Thomas Weber will then give an overview of the services and information events offered by the consumer advice centre in the field of energy and energy-efficient refurbishment. Last but not least, regional support services will also be listed. Relevant questions from participants can be answered to a limited extent.

The event is a cooperation between the districts of Borken, Coesfeld, Steinfurt and Warendorf and the city of Münster and is organised under the umbrella of the regional initiative "Münsterland ist Klimaland". The city of Bocholt supports the campaign and recommends interested citizens to take part.

Please note

This event deals exclusively with the aspect of financing. The advantages and disadvantages of various heating technologies, other issues relating to energy-efficient refurbishment or individual framework conditions cannot be discussed at the event. The consumer advice centre offers regular information events to clarify these questions. An overview of current events can be found here: [LINK](#)
