## Cemetery: Paths to be renovated on Tuesday

### Measure planned for Tuesday, 25 April // Sustainable procedure in use

Next Tuesday, 25 April, the paths at the Bocholt cemetery on Blücherstraße will be renovated in some areas. This measure is necessary to ensure that the paths can continue to be used safely and comfortably, according to the city of Bocholt.

A sustainable and material-saving method is used, in which the surface course is milled off and recompact. Bumps and holes will be removed in the process. The city asks for understanding for possible restrictions and noise that may be caused by the construction work on this day.
