Lecture: Photovoltaic system - The private energy revolution

VHS lecture on photovoltaics on 24 March 2026 // From 7 p.m. in the Media Centre // Online registration required

Under the title "Photovoltaic system - The private energy turnaround", the Bocholt-Rhede-Isselburg Adult Education Centre invites you to the Bocholt Media Centre (Hindenburgstr. 5) on 24 March from 7 pm.

Anyone planning to implement the private energy transition with a photovoltaic system and save costs at the same time is confronted with numerous questions in advance. On this evening, speaker Michael Birkhan will address the key issues surrounding the topic and explain them in the context of the current complex of topics.

Among other things, the presentation will look at what yields can be expected in the different seasons, whether a west or east-facing installation is worthwhile, whether the purchase of a local energy storage system to increase your own electricity consumption can make sense and whether tax-free allowances can be claimed. These and other topics will be at the centre of the evening, after which any other unanswered questions can be clarified.

The participation fee is 6 euros, with a discount 5 euros. Registration at www.vhs.bocholt.de is recommended due to limited seating. Remaining places will be allocated at the box office on site.
