VHS Lecture: Heat Pumps - The Heat Transition

Talk on Thursday, 26 November 2026 // 7.00 pm at the Bocholt Media Centre // Online booking and remaining tickets available at the box office

The Bocholt-Rhede-Isselburg Adult Education Centre (VHS) is hosting a talk on heat pumps on 26 November. The talk will cover various topics, including different types of heat pumps, costs, installation in existing buildings, financial incentives and a cost-benefit analysis.

In addition, the course highlights key tips on planning and implementation, and explores the specific challenges of combining photovoltaic systems, energy storage, heat pumps and electric cars.

The speaker, Michael Birkhan, has over 30 years' experience with heat pumps from a user's perspective and operates a climate-friendly air-to-water heat pump himself in a partially renovated old building.

The talk will take place at the Media Centre in the Alte Bahnhof Bocholt, Hindenburgstraße 5, and begins at 7 pm. The participation fee is 6 euros. Online registration at www.vhs.bocholt.de secures your place. Remaining tickets are available at the box office.
