Which water is the best water for you?

VHS seminar with tasting

On Thursday, 25 April, from 7 pm, the adult education centre is offering a seminar entitled "Water tasting - Which water is the best water for you?" The venue is the media centre on Hindenburgstraße.

We are all familiar with wine, whiskey and beer tastings, where different varieties from different regions are sampled. But with water? Doesn't it taste like anything? Far from it! Not all water is the same.

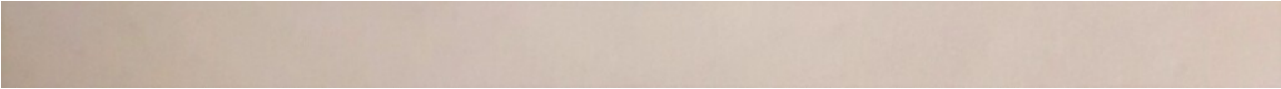

Water sommelier Bernd Kleine-Rüschkamp knows all about the mineralogical and sensory characteristics and will familiarise participants with the world of mineral waters.

In addition to exciting background information, there will be various tastings in between. An informative and entertaining evening all about the elixir of life, water, which will also focus on the topic of health and water.

The participation fee is 10 euros including tasting. Further information and registration online at www.vhs-bocholt.de or at the VHS office in Bocholt, Stenerner Weg 14a or the branches in Rhede and Isselburg.
