City promotes individual solar advice

Subsidised solar consulting: Consultation appointments available online

The city of Bocholt, in cooperation with the Rhine-Ruhr Climate Agency, offers SOLAR-STROM consultations for interested homeowners.

The consultations are individually tailored and very concrete. They include concrete amortisation calculations based on the wishes of the homeowners as well as a written report on the results of the respective analysis. Depending on requirements, topics include the combination of solar power systems with heating systems, a heat pump and/or a wallbox, as well as their realisation in combination with a green roof.

In addition, the question of whether it is more advantageous in the individual case to use the self-produced solar power or to feed it completely into the grid is clarified. The city supports the individual 45-minute ONLINE consultations by covering half of the costs. The personal contribution is 80 euros.

Interested persons who live in Bocholt should contact the Rhine Ruhr Climate Agency directly. Contact Annika Lipke at 02041 77394-14 or e-mail: [lipke\(at\)klimaagentur-rr\(dot\)de](mailto:lipke(at)klimaagentur-rr(dot)de).
