Info day: How to get your house warm!

25 March from 11 a.m. - 4 p.m. // Saving precious energy // Simple retrofitting of insulation // Free admission

Insulate your home effectively and save precious energy every day - experts will show you how to do this on 25 March at the information day on air insulation, hosted by the city of Bocholt. More at www.bocholt.de/infotag-daemmung

As part of its renovation offensive, the city of Bocholt is holding an information day on insulation materials and methods on 25 March, from 11 am to 4 pm. The focus of the event is on insulation options for double-skin clinker brick houses.

Specialist lectures and a small trade fair with companies from the sector will present various methods. Also represented: the Bocholt company Fenster Tepasse, which will present highly insulated window panes and frames.

The venue is Spencers Bistro in the Kinodrom, Meckenemstr. 8 in Bocholt. Admission is free. The event is the result of numerous responses from Bocholt homeowners whose houses do not yet have insulated exterior facades and who have not yet found suitable specialist companies or specific information on filling the air layer between sand-lime brickwork and clinker bricks. There was also a lack of an estimate of the costs to be expected for such an improvement measure.
