FW Bocholt: Bocholt fire brigade in action in Dinxperlo

Bocholt (ots) -

At around 09:50 this morning, the Suderwick fire engine of the Bocholt fire brigade was alerted to a suspected gas leak in the Netherlands.

The fire engine from Suderwick travelled to Dinxperlo and used measuring equipment to investigate a reported gas leak. Together with the plumber on site, a defect in the chimney was recognised, which can now be repaired by the owner. The operation was completed after a good 30 minutes.
