Planning and building

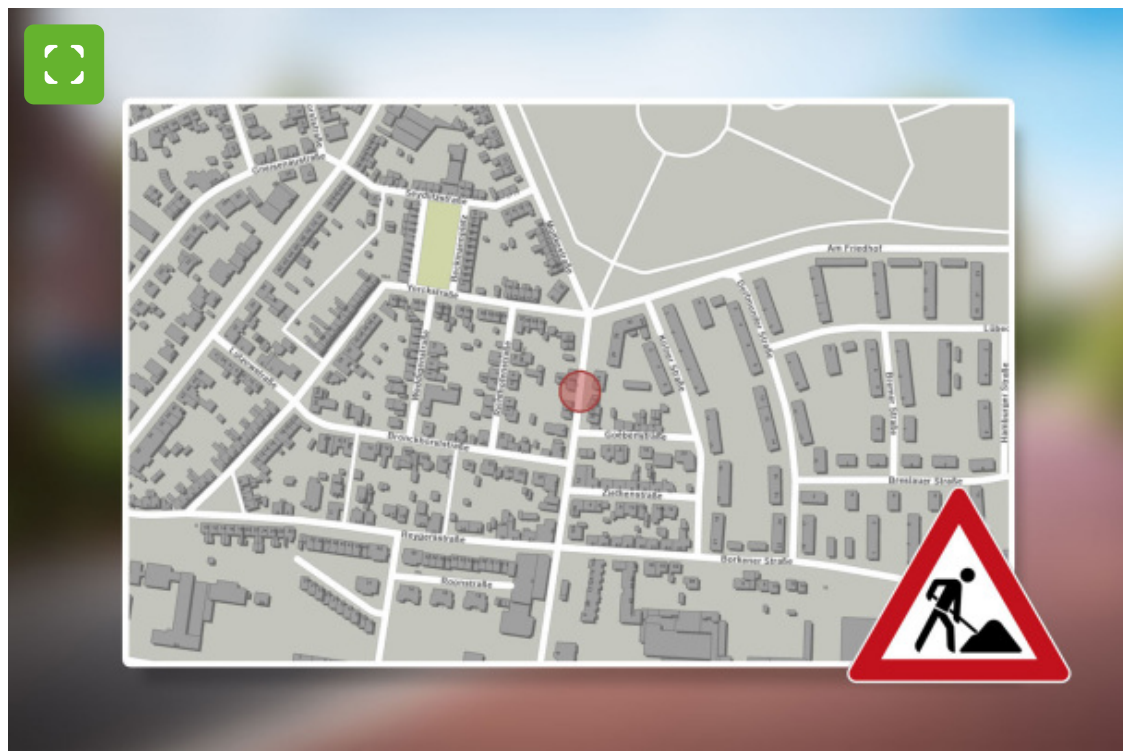

Moltkestraße partially impassable on 13 May due to crane installation

Full closure for motor vehicles in the morning // Pedestrians and cyclists can pass through the area

Due to a crane installation, Moltkestraße will have to be temporarily closed to motor traffic in the area of house number 27 on Wednesday, 13 May.

The restrictions affect the morning hours. Bocholt city council would like to point out that motorised traffic will not be able to pass through the affected section of Moltkestraße during the work. The crane installation on a building there makes it necessary to use the entire width of the carriageway in order to ensure a safe working process.

Pedestrians and cyclists will still be able to pass the construction site.
