Planning and building

Partial closure of Isselburger Straße from 5 January

Necessary work on supply lines by BEW

There will be traffic obstructions on Isselburger Straße from Monday, 5 January 2026. On behalf of Bocholter Energie- und Wasserversorgung (BEW), necessary work must be carried out on the supply lines, which is why the area will be closed shortly after the junction with Werther Straße.

An appropriate diversion will be set up and clearly signposted for all road users. The pavement can still be used. In order to ensure that everything runs as smoothly as possible, the neighbouring industrial companies have already been informed in advance about the measure and the associated restrictions. The city administration and BEW are endeavouring to keep the disruption to residents and moving traffic to a minimum.
