Planning and building

Passage in Biemenhorster Weg closed from the end of May

Closure of the thoroughfare in the period from 26 May to 25 June 2026 // Access for residents is still guaranteed

Biemenhorster Weg will be closed to traffic from 26 May to 25 June 2026 due to upcoming civil engineering work by stadtwerker to relocate the electricity supply. The affected area can be driven on from both sides up to the construction site, so that access for residents remains possible.

New power lines are being laid in Biemenhorster Weg on behalf of stadtwerker. It will therefore not be possible to drive through the entire section of road for around a month. The work will begin on Tuesday, 26 May 2026 and is expected to be completed on Thursday, 25 June 2026.

As the road will remain passable from both sides up to the construction site, residents will still be able to access their properties.
