Traffic

Ostwall partially closed for lane rehabilitation

Between Schonenberg and Osterstraße, the road surface is being rehabilitated // Traffic is diverted

Work on the Ostwall in Bocholt is nearing completion: until the middle of next week, the road surface in the area between Schonenberg and Osterstraße will be rehabilitated. Road users will therefore be diverted via the western part of the Stadtring. The work should be completed by 17 May.

According to the city of Bocholt, diversions have been signposted for car traffic. Pedestrians and cyclists can still pass through the area. Bus traffic will also be diverted for the duration of the road surface renovation.
