Traffic

Traffic count in the city centre

Data protection is guaranteed

In the coming week, the city of Bocholt is having a traffic survey carried out in the city centre, specifically in the Markt / Königstraße area, in order to be able to assess traffic and urban development measures on the basis of this data.

The survey is carried out using video cameras. Data protection is observed. People and vehicles are anonymised using technical measures (pixelation).

*Traffic data is collected in the Königstraße / Markt area.
