Traffic

Traffic: Traffic restrictions in the industrial estate

Reason: Sewage pipe between Wüppingsweide and Vennweg

In the industrial area of Bocholt, there will be traffic restrictions in the area of the roads Wüppingsweide and Vennweg / Loikumer Weg in the near future. The reason for this is the laying of a sewage pipe. Sectional closures are to be expected from 22 January.

The closure begins in the Wüppingsweide/Enhook section and then runs in a westerly direction via Pannemannstraße and Vennweg. Local residents have been informed of the measures. The construction work will last until mid-April.
