

Treasure lists

Population lists of the 17th-19th century from the Bocholt region

Registers of head counts and personal records, fire registers, registers of residents and household records from the city of Bocholt, from municipalities of the Bocholt district and from the present-day Bocholt districts of the former Liedern-Werth district help with genealogical, prosopographical, building and / or economic research.

The lists date from the time of the first civil registration in 1654 up to the 20th century. The Bocholt municipal archive offers a comprehensive insight into the lists, which Wolfgang Tembrink has digitally created in years of transcription from the original archive records. Thanks to the help of EWIBO and its employee Miroslaw Lewicki, the lists can now be presented on the internet.

The following lists are available for your research (free of charge):
