

Communal Integration Management (KIM)

© KI NRW

The **Municipal Integration Management (KIM)** advises **people with an immigration background**, taking into account their **individual life situation and needs**. In this way, the case managers provide support over a longer period of time in as many areas of life as possible in order to develop ideas and solutions together.

Another goal of the KIM is to **cooperate with various offices and actors in** order to analyse the integration processes and develop them further.

The Ministry for Children, Youth, Family, Equality, Refugees and Integration of North Rhine-Westphalia provides financial support for municipal integration management. The city of Bocholt participates in the programme in cooperation with the Municipal Integration Centre of the district of Borken.

Further information on the programme can be found here: [Website of the District of Borken on Municipal Integration Management](#)
