Digitisation

Goals

- Today, digitalisation influences almost all areas of life. It holds opportunities and risks, also for older people: From private communication to support in the event of a need for care.
- The Seniors' Advisory Council demands that digital technologies must be easy to use, as self-explanatory as possible and safe, and also available and affordable for everyone.
- There must be a right to technical support if it is possible and desired. Similarly, there must be a right to live without digital media and autonomous technical systems.

Information

- Artificial intelligence and old age (02.2024) ☑
- 10 demands for the digital participation of senior citizens (LSV NRW 10.2023)
- Seniors' Advisory Council calls for digital and paper-based applications for heating cost subsidy (09.2023)
- Mouse Mobile information flyer (09.2023)
- Uprising of senior citizens: Digitalisation of financial institutions (10.2022)

Overview: Online services of the city of Bocholt

The Bocholt city administration is actively shaping the digitalisation of society. Many government services have therefore already found their way online. The following link will give you an overview of the online services that are already available in Bocholt:
